

Recent Leadership Placements

This year has introduced a distinct set of challenges on both industry-wide and macroeconomic levels, hindering growth and expansion while making it extremely difficult to find the right talent. The stakes have been high, with critical hires taking significant time to engage, evaluate, and secure.

Despite—and perhaps because of—these conditions, we have been well-positioned to assist numerous clients with difficult-to-fill searches and challenging team-building projects over the past six months, ultimately enhancing performance, strategic direction, and profitability.

We take pride in having successfully placed a diverse range of experienced candidates across various roles, including technology, product development, go-to-market strategies, finance, operations, and board-level positions. Our expertise covers the entire deal lifecycle, supporting businesses from seed stages to IPO exits, and our comprehensive services enable us to collaborate as a single partner.

I am pleased to share with you a selection of placements that have been made through the Renovata & Company platform. If you need executive search support, require consultation, or are considering a career move yourself, please do not hesitate to get in touch.

Julia Barber
